

# ASSET SAGACITY

## IS A SMART DATA PLATFORM DEDICATED TO INVESTMENT PROFESSIONALS.

With it, our clients reclaim mastery over their data and leverage them to be more agile and more efficient.

These are key success factors in today's highly competitive environment, as both clients and regulators become more and more demanding.

### TURN A SELECTION OF BEST-OF-BREED SOFTWARE INTO AN INTEGRATED SOLUTION

We are pragmatic and we've never seen an all-in-one solution that really kept all its promises. That's why we have crafted a platform. Choose the software that best fit your activities or develop them in-house, then let us feed them data, retrieve and store their results, and just enjoy them as a unified solution.

### SMART DATA = BIG DATA + BUSINESS KNOWLEDGE

AssetSagacity combines innovative Big Data Technologies with our know-how and extensive knowledge of the Buy-Side industry to help users to master, secure and orchestrate their data.

**Master** : The core data model of the platform can be extended at will with data, whatever their form (structured, unstructured, numbers, text, timeseries...)

**Secure:** In addition to offering the highest standard of security (both physical and software), we also log every activity on the platform, to let you know what is modified, when, and by who.

**Orchestrate:** As a platform, our job is to give our client the ability to work with an unlimited number of heterogenous software. So our system adapts to both legacy and modern systems.

## **DESIGNED FOR THE FUTURE, READY TO ADDRESS YOUR CURRENT CONCERNS.**

Innovative yet pragmatic. Pragmatic yet ready for the future... We are a FinTech StartUp that loves innovation, even outside the financial tech sphere. We research any idea that can help our users create more value.

For example, last summer we launched our private chat program (Slack-like), that lets users take team communication to the next level.

We are continually expanding the capacities of our platform. There are so many incredible emerging companies in FinTech and RegTech we plan to work with and connect to our platform in the next months.

**Digital transformation is a tidal wave.  
Catch it with us and ride into a new era for your business.**
